

Press Release

3D Medical Expo, January 26-27, 2016

MECC Maastricht, The Netherlands

First global event with focus on healthcare related 3D printing

4 focused conferences and exhibition in the heart of a medical and materials development area in Central Europe

Maastricht – On **January 26th and 27th**, 2016, **MECC Maastricht**, the Netherlands, will host a **two-day exhibition** and **four conferences** focused on 3D printing and related medical technology.

After **2 successful editions** of the **international 3D Bioprinting Conference**, founder/congress organiser **Jakajima** and **MECC** decided to **join hands** and **facilitate a platform** where **innovators in 3D printing** show their latest **developments in 3D printing** for **medical, dental and pharmaceutical applications**.

Unique gathering for healthcare innovations

3D printing empowers **surgeons, researchers and medical device manufacturers** to work fast, test thoroughly and customize like never before. The **latest developments** in the complete value chain will be shown: from scan to software and from patient-specific implants, surgical devices to (bio)materials, during a **two-day exhibition** and **four related conferences**:

- **3D Medical EXPO** - With over 1000 exhibitor visitors and over 400 conference attendees, **3D Medical Expo** is a **unique live platform** with a focus on innovative companies in Scanning/Imaging, 3D Printing and (bio) Materials and research institutes.
- **3D BioPrinting Conference** - Focused on 3D Bioprinting, the conference is addressed to health care innovators, from tissue engineers to biomedical researchers and from hardware manufacturers to bio medical material suppliers.
- **3D Dental Printing Conference** - The topics of the conference will include Research on 3D Dental printing, Software and Dental Modelling tools, Importance of Customization for Dental Products, Specialized 3D Printing Services Required for Medical/Dental Markets, Scanners and Scanning tools.
- **3D MedTech Printing Conference** - The following topics will be covered: Developments in 3D printed medical implants, surgical guides, surgical instruments, hearing aids, insoles, Research & Development in 3D Medtech, changing value chains and the Changing role of the Doctor / Bio-engineer.
- **3D Medicine Printing Conference** will bring brilliant insights into areas such as: Research & Development in 3D Medicine / Drug Printing, Printing your own drugs (DIY), New materials (Active Pharmaceutical Ingredients), Changing value chains in the Pharmaceutical industry.

About MECC, Maastrichts Exhibition & Congress Centre

MECC Maastricht's product is success. With our flexibility, high level of service and entrepreneurial attitude we offer organisers, participants and visitors to trade fairs, congresses and events maximum success. Several international medical conferences and also TEFAF, world's leading art fair, take place in our modern exhibition and convention centre in the south of the Netherlands.

About Jakajima

Jakajima is the matchmaker for innovators in the high tech industry, ranging from 3D printing to Internet of Things, from Drones to Health Tech. We organize those activities that bring innovators from different value chains and different professions together, in order to endeavour innovations and to create new partnerships, products and/or services.

Arrangements for the media

The conference organizers welcome enquiries from electronic media and the press. Accredited journalists can attend this conference free of charge. We are happy to help arrange interviews with the speakers.

Please help us to help you. Press accreditation should be arranged in advance of the conference.

To register for a complimentary media pass, contact Esther Wendrich. She can be reached at e.wendrich@jakajima.eu or during European office hours on +31 620008576.
