## Intelligent Sensor Networks Conference

May 23, 2017

### *Managing Aging Plants*

**Eindhoven - On May 23 at the Messe Düsseldorf Congress Center in Germany, the Intelligent Sensor Networks Conference will be held, focusing on Managing Aging Plants (MAP). The challenges posed by an aging plant cannot be seen in isolation as a simple economic equation balancing profit and loss to risk and safety; the situation is far more complex. Many of today's managers do not have the academic background or the detailed engineering knowledge at their fingertips, which is essential to make the correct budgeting and strategy plans and keep facilities not only economically viable, but also productive and safe.**

Similarly, many companies no longer have the skills and competencies in-house to tackle the problems that can be posed by an aging plant. When knowledge is not immediately at hand, being able to ask the right questions is vital. The aim of the event in Düsseldorf is to help industry professionals in ensuring facilities continue to compete successfully in the long-term.

Topics that will be addressed at the MAP Europe 2017 Conference include: Smart industries, Condition-Based Maintenance/ Smart Infrastructure, Safety leadership and safety culture, Turnaround management and Monitoring and assessment. The conference enjoys strong participation from end-users, engineering companies, suppliers, notified bodies and governments with a clear emphasis on applications

and practical experiences.

Leading speakers will be:

- ***Regarding Smart interface structure***
- Willy Peelen, TNO on saving costs
- Oleg Guzniy, CEO Kinergizer
- ***Smart Industry and Technology***
- Henrik Vikberg, Cisco Systems, The real industry 4.0

Be informed about the conference and receive the latest intelligent sensor networks news. Follow [@isensornetwork](#) and join the [LinkedIn forum](#).

#### Press information

Press accreditation should be arranged in advance of the conference. It is granted to active editorial staff and freelancers, subject to proof of an editorial job function, a freelance commission or a valid press card. To register for a complimentary media pass, contact us by completing [this form](#) or by contacting Esther Wendrich. She can be reached at [e.wendrich@jakajima.eu](mailto:e.wendrich@jakajima.eu) or during European office hours on +31 (0)6 20008576.

## About Managing Aging Plants

Managing Aging Plants covers all topics related to keeping aging industrial facilities in good shape. Four themes have proven to function as key parts for finding, creating and managing solutions regarding the challenges posed by an aging plant. The four themes are; maintenance, safety, materials and future solutions. See more at:
