16 July, 2018, Eindhoven, The Netherlands

Two new 3D Printing conferences focused on Post Processing & Integration into Manufacturing

Jakajima, the international High Tech Conference organiser, has added two new 3D Printing / Additive Manufacturing Conferences to its successful 3D Printing Conferences Series.

On December 4, 2018, Jakajima organises two new 3D Printing conferences at Brightlands Chemelot Campus, Sittard-Geleen, The Netherlands: **3D Printing Post Processing Conference** and **Additive Manufacturing Integrated Factory Conference**.

- [3D Printing Post Processing Conference](#)

While the 3D Printing industry has strongly focused on the first two steps of 3D Printing: Design and Build/3D Print, the third step, Post-processing, has been overlooked. Post-processing encompasses all of the actions that are performed after parts are removed from a 3D printer.

The 3D Printing Post Processing Conference will cover issues, solutions and future trends in post processing, a phase that has impact on the following parameters within and for an organisation: Time, Facilities, Cost, Quality, Staffing and Safety.

- [AM Integrated Factory Conference](#)

There are many manufacturers who would like to be able to offer more individualization of the products they manufacture. With the growth of AM, more and more organisations are starting to look at the possibilities to integrate this technology in their manufacturing processes.

The AM Integrated Factory Conference covers the developments going on in further integration of additive manufacturing in production processes, and how to act upon.

“All our international 3D Printing Conferences have a specific topic, and we noticed that there were no dedicated conferences on these two topics” says Pieter Hermans, Matchmaker for Innovators at Jakajima. “so we decided to add them to our successful 3D Printing Conference series”.

Jakajima is the organiser of the following 3D Printing Conferences:

- www.3dprintingelectronicsconference.com (January 2019)
- www.3dmedicalconference.com (January 2019, Bioprinting, Medtech printing, Dental printing, Medicine printing, Augmented / Virtual Reality)
- www.3dprintingmaterialsconference.com (April 2109)
- www.3ddeconference.com (3D Design & Engineering conference, April 2019)
- www.3dcontentconference.com (April 2019)
- www.4dpmmconference.com (4d printing & Meta Materials Conference, April 2019)
- www.3dfoodprintingconference.com (27 June 2019)
- www.3dprintingpostprocessingconference.com (December 2018)
- www.amintegratedfactoryconference.com (December 2018).

Arrangements for the media

Jakajima welcome enquiries from electronic media and the press. Accredited journalists can attend this conference and/or arrange interviews with the speakers. Press accreditation should be arranged in advance of the conference. Accreditation is granted to active editorial staff and freelancers, subject to proof of an editorial job function, a freelance commission or a valid press card.

To register for media pass and/or more information about the conferences, please contact Esther Wendrich. She can be reached at e.wendrich@jakajima.eu or during European office hours on +31(0)40 2952135
